**MACK MODEL NR – 10 TON 6x4 TRUCK PARTS LIST**

**Mack Models NR-8, 9, 10 & 11—10 Ton 6 x 4 Trucks**

It is important to specify chassis serial number of vehicle when servicing same. Engine serial number should also be given. This is especially important when ordering parts. The illustrations below will assist in locating the serial numbers.

**Chassis Serial Number**  
stamped on front end of  
left frame side member

Typical numbers  
are shown.

**Chassis Name Plate**  
located on  
right hand seat support

**Engine Serial Number**  
stamped on right side  
of timing gear housing

## **FOREWORD**

Parts are listed in the order recommended by the Quartermaster General's Office. The first two digits assigned to each Group refer to the Main Group. The last two digits cover the Sub-Group and include all parts related to the Main Group. For example, the Engine Group is indicated as 01, the Clutch Group as 02, etc.; Sub-Groups such as Engine Assembly as 0100, Cylinder Block and Head as 0101, Clutch Disc as 0201, etc. There will be found on the following page an index covering all Code Numbers for both Main and Sub-Groups.

Mack Reference Numbers are also listed. The reference numbers are arranged to follow the Sub-Group number. For example the Cylinder Block and Head Group Number is 0101. The Reference Numbers for this group start with 0101-1 and continue in numerical sequence. Reproductions of line drawings and photographs are provided, showing the parts in true relation to each other and each part is indicated by a Reference Number.

The Numerical Index provided at the end of the list is coded to indicate parts that are used on commercial models and is indexed to the Group in which the Part Number is listed, while the Alphabetical Index lists parts under their descriptive noun, and is also indexed to the Group.
